Hill Beats "Tuffy"

The Raymond Rustlers maintained their place at the top of the baseball league by defeating the Magrath Tigers 4-2 in a hard fought battle here last Wednesday.

Invincible (?) Joe Tuftland served on the mound for Magrath and Hill opposed him for the homers. Both pitchers worked out of some tight places. Hill kept the visitor's hits well scattered allowing them only one earned run, while Tuftland let Raymond bunch their hits in the eighth to score three runs.

This is how they scored: Magrath made the first run on errors. Raymond tied the score in the sixth when R. Kirkham reached third on errors and came home on Hill's hit. The visitors scored in the seventh on three short singles. Raymond came to the bat in the eighth one run down, the first batter struck-out, R. Kirkham made a long drive for three bases, the next batter struck-out, Brewerton singled scoring Kirkham and came home on Hicken's triple, who in turn scored on J. Kirkham's hit.

Nalder relieved Hill in the box in the ninth and ended the game in snappy style. Only four men faced him.

Magrath 7 hits and Raymond 8. Tuftland struck-out 7 men, Hill 5 and Nalder 2. Hill walked 3 men and Tuftland one.

Hill adds to our pitching staff. Even Oltsead, renowned batter, only got one hit.

Hicken's always their in a pinch. MacLean was missed from the

been used to good advantage in one of several positions.

Fans were surprised to see that Rolfsen drew a bench position at Wednesday's game.

The farmers and the liberals are using space liberally in this sheet to present their views on the coming election to local electors. Read these ads. carefully. They contain much information that every voter should know.

FOR SALE—12 Purebred Leghorn Pullets at 75c each, and 10 Leghorn Hens at 30c each—Apply N. L. Mitchell, Raymond.

FOR SALE—Mower, Rake, Hand Plow, One-horse Cultivator.—See G. H. Organ, Raymond.

Challenge

A challenge is hereby issued by sugar factory employees to business men and clerks of the town of Raymond to play a series of three games of baseball, (best two out of three falls) catch-as-catch-can, to be played at any time named by our opponents for money or marbles. Sgd. J. W. Evans. Fieldman.

Regarding the defy issued by sugar factory employees to local business men and clerks, the Recorder has no hesitation in picking the business men's team to win hands down. Here is the winning lineup the Recorder would suggest: battery, Nalder and Brewerton, 1b Dick Scott, 2b Jim Walker, 3b Roi Stone, s.s. N. Jeffery, fielders, Ira McBride, Grant Holt, Casey Jones, and other players Orvin Nielson, Lou King, Chas. Tittsworth, Thos. Ott, Irvin Hall, Frank Hall, D. C. Peterson, Bruce Linkous, Ross Larson, L. D. King, and Heber Allen, and Bert Kirk for umpire. With Bert on the job we can't lose! There J. W. can you beat it?

Extra prize lists for the school fair will be off the Recorder press today. A glance over the prizes donated gives one the idea that business firms are taking a generous and wholehearted interest in the school fair.

"Wind of Chance" the picture showing at the Rex the last three days of next week, is one of the most recent stories by Rex Beach. It is a thrilling drama of the Alaskan snow regions, with an all star cast.

Gleaner Girls Celebrate

The gleaner girls of the Raymond First Ward M. I. A. spent a very enjoyable morning in the open on Saturday. At 4.30 a. m. they met at the home of Mrs. Kate Card, gleaner Supervisor. Each girl armed with plate, cup and eating utensils, came with a hearty appetite to enjoy the smoke seasoned breakfast so popular with campers. Those present were Kate Card, Mamie Roberts, Zetella Taylor, Alice Shaw, Opal Wiggil, Elsie Cain, Pauline Redd, Mary Redd, Annie Stevenson, Edna Rolfsen, Anne Snow, Larne Meeks, Lettie Litchfield, Zula Coleman, May Snow, Lura Redd, and Manilla Meldrum. These girls are planning other such activities for the summer.

The new residences of Bid Mel-drum and J. M. G. ... completion ... S. Ellis was given both contracts.

LOST—Small dark brown fur. Reward to finder.—Mrs. O. H. Snow, Raymond.

Attract The Tourists

It is an economic truism that the imports and exports of a country must balance. That is to say, if a country imports more than it exports it must pay the difference in gold, which means that it sends money out of the country, that is, exports it. This is the balance maintained. On the other hand, if a country exports more than it imports then it has to be paid, which means an import of gold. Thus the country whose exports in raw materials, natural products, manufactured goods and general merchandise exceed imports of a like character, and to whom the importing countries must therefore remit gold in order to balance accounts, can hardly help but prosper and grow wealthy.

There are, however, what are termed invisible imports. For example, Great Britain is obliged to import food and other necessities of life on a huge scale, and it not infrequently happens that British exports of coal and manufactures do not equal these imports in value. Thus the balance of tangible trade is against Great Britain. But this is more than offset by the fact that the mercantile marine of Great Britain is the greatest trade carrying agency in the world and all countries pay tribute to Britain. The earnings of British shipping constitute a great but invisible import, and these imports, like exports, add to the national income and wealth.

There is another class of imports which operates in the same advantageous way, and one in regard to which Nature has equipped Canada to reap great benefits if the Canadian people make full use of their opportunities. We refer to tourist traffic. A tourist brings at least one thing with him—money. He spends it in travelling and hotel expenses, in means of recreation and pleasure, and in purchases in the country visited. Making Canada attractive from the standpoint of the tourist is, therefore, good national business. It will not only draw countless thousands of visitors from other countries, but it will encourage Canadians to spend their vacations in Canada, thus keeping their money at work for and in Canada, and in making them better acquainted with the Dominion and its enormous possibilities.

As already stated, Nature has done its part in richly endowing Canada with some of the finest scenery in the world and by making the Dominion a veritable sportsman's paradise. The Canadian climate, both in summer and winter, makes a strong appeal. But these things are not enough in this age. Tourists not only demand these things, and a marked change from the environment in which they live most of the year, but they insist on all modern comforts and conveniences, and go where they can be obtained.

Canada must, therefore, be made a country noted for its good roads if it is to capture any large share of the automobile tourist traffic which has now reached such large proportions. Canada must cater to the needs and tastes of all tourists by chains of good hotels, by bungalow camps, attractive summer and winter resorts.

Tourists will go where the greatest hearty pleasures, the best roads lead and reasonable comfort and necessary conveniences can be enjoyed. A motorist tourist along a good road arriving at a town or village which presents a well kept and clean appearance, streets well treed, an attractive little park, and residential lots, both back and front, tidy and with trees, shrubbery, grassy spaces and flowers, and where the hotel, no matter how small, is spotlessly clean and good meals served, will almost certainly stay awhile. But if the town or village is the opposite of these things, it is even more of a certainty that the tourist will hurry right on.

It is not some magic to make our prairie cities, towns and villages pleasant and attractive. But it takes more of time and patience than it does real money to transform them as many have been and are being transformed into places of real beauty and restfulness. It is the development of the right type of community public spirit that really counts in the achievement of results.

The securing of a fair share of the growing tourist traffic of the continent is something that no Canadian city, town or village can afford to neglect. It is cash business, and frequently leads to larger and unexpected business developments, because many a tourist while on pleasure bent is also keeping an eye open for investment and business opportunities.

And making of the home town bright, clean and attractive is in itself paying dividends to all the townspeople in increased local pride and pleasure at home throughout the whole year.

Must Fly British Flag

Using Other Flags Alone Forbidden by Bermuda Law

Because so many houses in Bermuda were flying the United States flag alone, the Bermuda House of Assembly has passed an act forbidding the flying of any flag unless the British flag is also flown. The United States flag was being displayed to attract tourists it was ascertained, and not because the inmates of the house were Americans.

Destructive Dust Explosions

No less than forty-five were killed, twenty-eight injured and \$3,000,000 property damage done by dust explosions in the United States in the last year. The explosions occurred chiefly among manufacturers of wood and aluminum wares, starch, feed, cocoa, spices, sugar.

High Altitude Affects Taste

Everest Climbers Found Onions and Peppermint Had No Flavor

A curious effect of high altitude was found, it is said, by the men who tried to reach the summit of Mount Everest. At a height of ninety thousand feet the explorers lost their sense of taste, such food as onions lost its flavor, and peppermint had no pep left by which it might be known.

Fingerprints Fall

Score one against the Bertillon system. Fingerprints of two prisoners in New York could not be classified by police because ridges of their fingers had been worn off during bricklaying operations.

The only innocent, harmless things to which man has a natural aversion are worms and spinach.

Is Learning the Business

Heir to Woolworth Millions Working in Long Island Store

Newspaper supplement editors will be glad to learn that Mr. Norman Woolworth, of the second generation in five and ten cent store business, is hard at work in the F. W. Woolworth store in Flushing, Long Island. Mr. Woolworth, whose income is said to reach \$3,500 a day, is serving out his time under one of those queer wills which make it incumbent upon the heir to learn the business from the bottom up. He wears overalls in the cellar, where he is officially known as "head of stock."

When the six p.m. gong rings a large Lincoln draws up to the door of the five and ten, and the pumpkin develops six cylinders, with a five-cent chauffeur in attendance. The heir to the Woolworth millions gives James the high sign and is driven down the road a bit to one of the show places of Flushing, where he lives.—The New Yorker.

They Worked a Miracle for Him

So Says Ontario Man of Dodd's Kidney Pills

Mr. H. Austin suffered with backache, headache, and was gradually losing strength.

Coldwater, Ont.—(Special).—There is no more enthusiastic believer in Dodd's Kidney Pills anywhere than Mr. H. Austin, a well-known resident here. He has good reasons for his enthusiasm. He writes: "This is to praise Dodd's Kidney Pills for what they have done for me. I think it is a miracle. I suffered so much with my kidneys and pains in my legs and back. My head ached and, in fact, I seemed to lose my strength. After using six boxes of Dodd's Kidney Pills I am now quite well. Thanks to Dodd's Kidney Pills, which I always keep in the house now. I have gained in weight."

Many men suffer periodically with backache and, as middle age approaches, the pain increases in severity. Best may give temporary relief, but Dodd's Kidney Pills do more than this. They strengthen weak kidneys and remove the cause of the pain. Obtained from druggists everywhere, or The Dodd's Medicine Co., Ltd., Toronto 2.

Vodka Has Bad Effect

Is Blamed For Growth of Loafing in Soviet Factories

The re-introduction by the Russian government of vodka of the war strength of 40 degrees is blamed by many in that land for the growing increase of loafing and abstention from work in Soviet factories.

The whole press, led by Economic Life and The Moscow Worker, is waging an anti-vodka campaign. As worker correspondents from many factories point out, the decline began last fall, which seems to connect it definitely with vodka.

One writer from the Moscow steel works says: "Unnecessary absences from work increase 25 per cent. after pay days, the reason being drunkenness," which seems to dispose of the alternative reason advanced in some quarters that the growth of Soviet industry has brought in a number of unqualified workers from the country, lacking labor discipline, and causing accidents through unfamiliarity with their machines.

Studying Industrial Conditions

Eight English Workmen Sent to U. S. By London Paper

A unique delegation arrived in New York recently aboard the Carmania. They were eight British workmen. One was a patternmaker, one a boiler-maker, one a blacksmith, one a tool-maker, one a welder, one a ironworker, one a fitter, one a "machine man." They came to the United States for four weeks on invitation of the London Daily Mail, one of Lord Rothermere's papers. They are eight actual workers, not labor leaders, sent to examine working conditions, wages and industrial methods in the United States. The newspaper is paying all their travelling expenses, paying their wives (who remain at home) the men's usual wages, giving the men one hundred dollars each for extra clothes and fifteen dollars a week spending money, and providing each with a five thousand dollar life and accident insurance policy while on the trip.

Boys' Hostel At Edmonton

The Church of England has opened a boys' hostel at Edmonton, the first of its kind in Alberta. The first lot of boys who will be cared for at this institution will arrive this month under the auspices of the church. A similar hostel has been operated in Montreal for some time and has met with considerable success, in placing boys on farms in the provinces of Quebec and Ontario.

A Reciprocal Tariff

Canada Would Reduce Duty On Cattle If United States Takes First Step

Hon. W. R. Motherwell, minister of agriculture, announced in the House of Commons that the Canadian Government was prepared to adopt a "brick for a brick policy" with the United States in the reduction of duties on cattle. "Every step taken by the United States Government," he said, "in the way of a reduction in duty on Canadian cattle will be met by a corresponding reduction in the Canadian duty against American cattle. We have a brick for brick policy. That is to say every brick the Americans take off the tariff wall against us will be met with the removal of a corresponding brick from our tariff against American cattle." Mr. Motherwell announced that the government this month had passed an order-in-council authorizing the minister of finance to take such action as may be necessary in the direction of reducing the Canadian tariff on cattle in the event of the United States making similar reductions.

HOW WEAK GIRLS CAN GAIN STRENGTH

It Comes Through the Tonic

Dr. Williams' Pink Pills

In the life of almost every girl there comes a time when weakness attacks her. The strain upon her blood supply becomes too great, and there follows headache and backache, loss of appetite, attacks of dizziness, heart palpitation and constant weariness and a tendency to a decline. All these symptoms may not be present in any particular case, but the presence of any one of them shows the necessity for prompt treatment. And there is no other treatment so sure and so speedy as that through the blood-making qualities of Dr. Williams' Pink Pills. They are the one thing needed to maintain the health of growing girls and women of mature years.

Here is a bit of positive proof of the value of Dr. Williams' Pink Pills in cases of this kind. Miss Clara Fraser, Thessalon, Ont., has been brought back to health and strength through the timely use of this medicine, and gives expression of her gratitude as follows:—"I feel it a duty as well as a pleasure to tell you what Dr. Williams' Pink Pills have done for me. They have restored me to health. I, indeed, they did not save my life, I was suffering greatly from anemia, I lost flesh and always felt tired and nervous. At last I grew so weak I had to remain in bed. The doctor did not seem to help me any and I was growing weaker, and my heart was bothering me. At last a friend who called to see me said she had read of a similar case restored by Dr. Williams' Pink Pills and urged me to try them. I felt helpless but decided to take her advice, so my mother got me a supply of the pills and I began taking them. It was not long before I began to find benefit from the use of the pills, and in less than two months my health was restored. In fact I was in better health than I had ever enjoyed before. I strongly recommend Dr. Williams' Pink Pills to all who are weak and run down, for I feel sure they will not be disappointed." You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Acreage in sugar beets in the irrigated districts of Southern Alberta will reach 7,000 acres this season. This is 1,000 acres more than the contracted area of last season.

LEG SORES

ARE CURABLE. If you suffer from Leg Sores or Varicose Ulcers, I will send you ABSOLUTELY FREE a copy of my famous book that tells how to be rid of these troubles for all time by using my remarkable painless treatment. It is different from anything you ever heard of, and the result of over 35 years specializing. Simply send your name and address to Dr. H. J. WHITTAKER, Suite 25, 421 East 11th Street, Kansas City, Mo.

Owing To Increase In Population World May Soon Be Facing A Very Serious Food Shortage

Soy beans, peanuts and bananas may rank among the world's most important sources of food and the consumption of fish will increase tremendously in the next century, thinks Dr. Samuel C. Prescott, head of the department of biology at Massachusetts Institute of Technology.

Speaking on "The World's Food Supply—Its Sources and Preservation," Dr. Prescott revealed that natural scientists, looking 100 years into the future, are already searching the earth for new sources of food and seeking means of conserving the known sources to avert a shortage in the next century.

It is estimated, he said, that the United States with a population of approximately 110,000,000 now, produces only enough food to feed a population of about 110,000,000. The fact that the world's population has doubled in 60 years, he pointed out, is an indication of the importance of losing no time in finding new sources of foods and using the present supply more effectively.

The first great retrenchment in the world's food supply will come in meat, Dr. Prescott declared, in forecasting that the present generation may live to see a great proportion of its meat coming from the tundras of the Arctic and the countries of the tropics, where the goat and some types of cattle can be raised.

Land in the temperate zone now used for cattle raising will in the future be given over to intensive agricultural purposes wherever soil conditions and water supply will permit.

Corn will probably be more generally used as human food in the future, and additional use will be made of grains now often scorned, he said. Already a palatable flour is being made from bananas, which have practically the same nutritive value as potatoes, and such flour may find use in connection with cereals in supplying carbohydrates, according to Dr. Prescott.

Advantages Of Egg Grading

Results In Stronger Demand And In Better Prices

THE ADVANTAGES OF EGG GRADING ARE INCREASINGLY BEING REALIZED BY THE EGG PRODUCERS OF THE DOMINION.

Egg grading (the excess smart grey and it is resulting in a rapidly increased per capita consumption. According to officers of the Dominion livestock branch this increased consumption has amounted to over ten dozen eggs per person in the last five years, and during that period prices have been more uniform and more profitable to producers than ever before. The great deterrent in the way of increased production in the past has been the fact that too often one egg found to be good was no criterion of what the next would be. Grading has resulted in a dependable product, thereby increasing the demand and maintaining the price.

Likes Canadian Cattle

Shipment of Steers Pleases a Former Opponent on Cattle Trade in Britain

Col. H. A. Mullins (Conservative, Marquette) said in the House of Commons that he had received a letter from Lord Blelisle, under-secretary of state for agriculture in the British Government, stating that he had received 100 Canadian steers and that he was very much pleased with them. Lord Blelisle was formerly an enemy of the cattle trade.

Colonel Mullins asked if anything was being done to facilitate the transportation of Canadian cattle.

Mr. Motherwell said that everything possible was being done. New plans were now afoot and later developments might be expected.

Fox Farming In Manitoba

Fox farming has been making considerable progress in the Brandon district during the past couple of years. Two large ranches are now located quite close to Brandon, in which a large sum of money has been invested. A syndicate has about 57 pairs of silver black foxes, while a pool has about 17 pairs of the same kind of animals on a newly established ranch.

Big Oil Production

With a slough well producing oil of exceptionally high quality at a rate of 140,000 barrels a year, the value of the oil resources of Southern Alberta seems about to be established. This well is the largest producing well in Canada.

A micro-micro-second, a millionth of a millionth of a second, can now be measured by a new invention.

May Benefit Agriculture

Discovery Made By Member of Staff of the University of Alberta Is Announced

A discovery which may be of far-reaching consequence to practical agriculture and especially to the cultivation of oats, has been made by Leonard Huskins, member of the staff of the University of Alberta, according to an announcement in the London Daily Telegraph. Working under Professor Gates, of the department of botany at King's College, Cambridge, on the subject of genetics and cytology of oats, Mr. Huskins is said to have established the fact that "fatoid" or "false wild" oats are a special type of mutation brought about by a loss of hereditary material known as chromosomes, or by an interchange of certain portions of them.

It is considered that as a result of Mr. Huskins' discovery the line of research for the total eradication of fatoids should be fairly open.

Mr. Huskins is holder of one of the three scholarships offered annually in Canada by the Permanent Royal Commission for the Exhibition of 1925.

Britain Is Famous For Pedigree Stock

One Industry In Which Country Relies Supreme

There is one industry—in which Britain remains supreme. From pigs to ponies and from sheep to shorthorns, British breeds are acknowledged to be the best in the world and are bought by foreigners at high prices to improve the foreign breeds. During 1925 the Russian Government bought from British breeders 250 pedigree pigs.

England has always been famous for her cattle and her sheep. Nearly 300 years ago huge oxen were produced there. In his diary, Evelyn speaks of an ox that was 19 hands high and four yards long, and that was in 1649. At that date Leicestershire sheep had already obtained a great reputation and fetched big prices. The average

England Improving Highways

Blossoming Trees Transform Main Routes Into Shady Avenues

A vision of highways transformed into shady avenues of flowering trees is created by the suggested improvements for the new arterial roads that are appearing in all parts of England. When these were first constructed it was found that, though they served their main purpose well, they still appeared broad, smooth tracks without any claims to beauty.

Under the Roads Improvement Act, passed in August, 1925, it is possible in remedy this fault in several ways. The most practicable method, and one that has already been adopted in certain instances, is to line the bare stretches with blossoming trees planted at short intervals.

Middlesex is the first county to attempt to beautify its roads in this fashion, and by the end of the year 30 miles of the main routes in this county will be turned into fine avenues of trees.

Impressed With Canada's Wealth

Resources Worth Working For Says Duchess of Athol

The Duchess of Athol, under secretary of state for education, who has returned to London from a tour of Canada is considerably impressed with the latent wealth of the Dominion.

In an interview the Duchess said that while Canada was already a great and wealthy country, the resources yet to be developed were well worthy of all the toil and sons and daughters of the British empire could devote to it.

One conclusion which had been formed on her trip, she said, was the paramount need in Canada for more male and female immigration of the "right sort."

At A Standstill

"Yes," said the young writer, "I've got pretty deep into my new novel now."

"Ah," remarked his friend, "the plot is thickening, eh?"

"Yes, I guess it is; at any rate, I'm stuck."

Peggy: "Does your husband talk in his sleep?"

Polly: "No, it's awfully exasperating. He only smiles."

Manitoba Farm Boys' Camp

Party of Ninety Boys From Rural Manitoba to Attend Brandon Fair

Arrangements are well under way to entertain at the Provincial Exhibition, Brandon, a party of ninety boys from all parts of rural Manitoba. Teams composed of three boys, ranging from fourteen to nineteen years of age are representing their respective districts, at the third annual Farm Boys' Camp, which is now one of the leading features at the provincial exhibition.

This year the camp will open the evening of Tuesday, June 29th, and will continue until Friday evening. While in camp the boys will be the guests of the exhibition board.

The livestock judging competition, which is a feature of the camp, will commence Wednesday morning. Classes of horses, beef and dairy cattle, sheep and swine, will be judged by the boys.

The McKirdy Cup, which is competed for annually goes to the team scoring highest. Gold medals donated by the Manitoba department of agriculture will be awarded to each member of the winning team; silver medal to the second highest team. Liberal cash prizes are offered to those scoring highest in each class of stock. Mr. James A. Richardson, of the Winnipeg Grain Exchange, has donated a handsome gold watch for the boy with the highest aggregate score and a silver watch to the second highest aggregate.

In addition to the judging competition, an interesting programme is being arranged. This will include an evening on the grandstand, an opportunity of seeing all departments of the exhibition, a visit to the Dominion experimental farm, and points in and around Brandon.

Entries have been received from some twenty-five points throughout the province. Some of the new points entering a team for the first time include Grosse Isle, Swan River, Griswold, Oakville, Charter, Ethelbert, Virden, Morris and Neepawa.

Egg-Laying Contests

Improvement Brought About By Better Selection of Individual Birds

The Canadian national egg-laying contests have now been in operation for six years. In a survey of the work in its latest report the Dominion poultry husbandman states that the average production in the last year

with 122.5 eggs in the 1924-25 contest. This striking improvement was in a large degree brought about by better selection of individual birds used in the contest, choosing pullets of proper age and development, advanced methods of breeding, and improved contest management. Production costs in the contests show that the average bird brings a net income of \$2.80, which is a fairly good profit.

Saskatchewan Egg Pool

The new Saskatchewan Egg Pool within one week shipped from the Saskatoon branch seven carloads of eggs to Montreal and eastern points. As many as three hundred cases of eggs a day are being received and Saskatoon's daily total exceeds the combined daily receipts of all other provincial branches.

Profitable Lamb Feeding

Illinois Man's Method For Preparing Stock For Market

"Buying right and selling to advantage are only half the battle in profitable lamb feeding," F. B. Lloyd, of Sycamore, Ill., says. He fattens 600 lambs a year on his 240-acre farm.

"For the first sixty days it costs little to put on ten pounds of gain per head. The lambs have the run of cornfield, meadow, pasture and stubble, picking up feed which otherwise would go to waste. At night they get a handful of barley and a little clover or alfalfa hay. If the rustling is good the lambs don't care for much other feed."

After sixty days I shut them up and feed barley and hay. During the last six weeks I feed a little corn. Usually they top the market if they have had half a start while on rough feed.

As a rule I keep lambs four to five months, depending upon the market. By this time a 55-pound feeder will weigh about 80 pounds, the size liked best by buyers. If the market gets to acting up during the feeding period because of the first cheap ten pounds, I'm in position to dump them at the original price, or even a little less, and still be ahead."

Adds To Land Values

Alberta May Tax Farms Past Which Telephone Wires Are Strung

The Alberta Government has suggested a tax on lands past which telephone wires are strung, and there has been quite an outcry against the proposal. Why, says one, should a farmer pay for something which he does not want in order to help another man secure a phone? But the phone users point out that often the main line may pass many unused farms which are held for speculative purposes and as the running of the telephone past these farms certainly adds to their value, why should they not pay for the added value? It is significant that the United Farmers of Alberta have placed their imprimatur upon the proposal, and it will probably become law.

Excellent Ranching District

Shipment of Cattle Sent 500 Miles North of Edmonton

A large number of cattle were sent this spring to the Fort Fitzgerald country, 500 miles north of Edmonton.

Shipped, for, taken by train to McMurray and thence by boat to their destination. Although the Fitzgerald district is far north, on the limits of Alberta's boundary, it contains an excellent ranching and ranching area and has been proved suitable for the raising of livestock. This will be Canada's farthest north ranching district.

Alberta Sands For Paving Purposes

Definite arrangements for testing the McMurray sands for paving purposes have again been entered into between the Edmonton civic authorities and Thomas Draper, owner of extensive holdings in the north. Similar experiments to those made last summer will again be performed.

Bad news and soft-boiled eggs should be broken gently.

Points The Way To A Stronger National Sentiment And A Stronger Canadianism

Lightens Farm Tasks

Pittsburg Farmers Cultivate Crops to Music of Radio

Farmers and commuters in the southern border of Pennsylvania are cultivating their crops to the music of radio. No longer is there a question of keeping the hired man in the fields till sundown—not when he can ply his hoe in time to his favorite jazz. No longer do the boys run off to the village when the baseball scores and music by the band is carried to them by the loud speaker erected in the farmyard.

In Western Pennsylvania the sun is still high in the sky and it is but mid-afternoon on the farm when the eastern stations begin their programmes. Why should the music be lost? The farm lads place the receiving set on the wheelbarrow, erect a temporary aerial, drive an iron pin in the soft ploughed earth for a ground and tune in.

The craze for outdoor radio reception has spread and cabinet sets are readily transferred from the houses to wheelbarrows, express wagons and dog carts and carried to the fields and gardens. Music keeps the boys at work, the farmers say, and the commuters, while tilling their gardens and flower pots, do not miss the programmes to which they were accustomed during the winter.

Canada Could Extend Market

British Honduras and Other Southern Countries Would Buy Canadian Products

Canadian manufacturers are losing much by not paying more attention to their Central and South American trade, in the opinion of his excellency Major J. A. Burdon, C.M.G., governor of British Honduras, who spent a day at the Fort Garry Hotel, Winnipeg, recently. His excellency called attention to the fact that Canada exports very little outside of wheat products to the countries on the equator, and stated that the United States and Germany are selling goods there which might well be sent from Canada. People in those countries, and in British Honduras especially, would buy Canadian goods if they were offered in the right way, he said, but so far Canadian merchants have not gone to the trouble to present their goods in a manner which appeals. While 98 per cent. of the flour used in British Honduras is from the Canadian west, there is an appalling scarcity of other goods, he said.

Real Estate Values

The United States paid \$295 an acre for the Virgin Islands, \$35.50 an acre for the Canal Zone, 25 cents for the Philippines and 2 cents for Alaska. Dearborn Independent.

Brazil uses convict labor in much of its road construction.

Brazil occupies an area equal to that of Europe.

Would Teach Housewives

Advocates Expert To Educate Housekeepers Re Points On Beef

Several speakers at the annual meeting of the Eastern Canada Livestock Union held in Toronto emphasized the need for a "better beef" campaign throughout the Dominion. Equal in importance with the necessity of improving the quality of beef was the necessity for educating the consumer to an appreciation of what good beef really meant.

W. H. Porter, of London, Ont., advocated the employment by the federal livestock branch of an expert who would be available for educational work among consumers, to give practical demonstrations of the difference between good cuts and poor ones. Canadian housewives, as a general thing, did not know good beef declared Mr. Porter.

Saving Nitrogen Fertilizer

New Product May Soon Be Placed On Market

Each year 210,000 tons of nitrogen are lost down the sewers of the United States. The first step in the recovery for the farmer of this essential plant food has been taken through the erection of an \$8,000,000 sewage disposal plant at Milwaukee, Wisconsin. By using a new method of sewage disposal, Milwaukee plans to accomplish the double purpose of purifying the water supply and of placing on the market a new organic fertilizer.

Men resemble whales. They no sooner get to the top than they begin to blow.

Pleasure Tours Instead of Train Trips During English Strike

Not even a general strike involving some four million workers interfered with Canadian Pacific Railway transportation in England. The company ran on regular train time schedules, giving the travellers ample time to make the usual arrangements. All of the travellers voted the motor trip through England well worth while.

At its best in May, old England presents beautiful rolling downs, long shady roads and charming views, affording a two hundred mile pleasure tour instead of a mere train run. In order to carry out all obligations fully to patrons the Dominion Express Company had a complete fleet of motor vans chartered to deliver and receive shipments during the strike.

Saving Nitrogen Fertilizer

New Product May Soon Be Placed On Market

Each year 210,000 tons of nitrogen are lost down the sewers of the United States. The first step in the recovery for the farmer of this essential plant food has been taken through the erection of an \$8,000,000 sewage disposal plant at Milwaukee, Wisconsin. By using a new method of sewage disposal, Milwaukee plans to accomplish the double purpose of purifying the water supply and of placing on the market a new organic fertilizer.

WORLD HAPPENINGS BRIEFLY TOLD

A new dish with all the taste and appearance of ice cream but composed principally of rice powder, is the invention of a San Francisco Chinese.

The customary Dominion Day dinner in London this year has been eliminated in favor of a combined reception, dance and concert, to be held in the Canadian Building.

Sir Herbert Ames, Montreal, financial director of the League of Nations, has tendered his resignation, to take effect next July, according to J. Bleier, his assistant.

Dr. A. G. Doughty, Dominion archivist, has been appointed chairman of the public records commission, according to an announcement made in the Canada Gazette.

"About 1,300,000 tons of Alberta coal will be used by the Canadian National Railways in Western Canada this year," according to R. C. Vaughan, vice-president of the Canadian National.

Government terminal elevators in Canada earned a total of \$769,640 in the last crop year and spent \$340,466 in operating expenses, it was stated in the House of Commons in answer to a question.

New Zealand, always a popular borrower in London, asked for another loan, this time of six million pounds, and the loan was subscribed ten times over within an hour. The loan is at five per cent, and the bonds were offered at the price of 98½.

The "Produced-in-Canada" exhibition, whose primary work is declared to be "to help Canadians that they might help themselves," was officially opened in the Hamilton armories by Hon. Harry Cockshutt, lieutenant-governor of Ontario.

Legislation forbidding the removal of Indian relics from British Columbia and designed to prevent their mutilation by vandals will be introduced at the present session of parliament according to word received from Ottawa by the native sons of British Columbia it is announced.

Modern Highway Across Canada

All-Canadian Road From Halifax To Vancouver Before End of Year

Four different governments have at last heeded the call for an all-Canadian highway stretching from Halifax, N.S., to Vancouver, B.C. Four governments have met on equal ground, and each has pledged the completion of the necessary work. Ontario says: "We are already completing our last remaining link," Alberta is to have its link ready this year. The Dominion Government, speaking for Jasper National Park, states that it will link up with Alberta this year, and British Columbia, the last to fall into line declares, "When the Jasper highway reaches Tete Jaune Cache, British Columbia will have a road ready to carry it on to Vancouver." It will be possible to tour across Canada on a modern highway before the end of the present year.

Stone Age Weapons Efficient

Recently Discovered in England Have Edge Keen As Razor

An arsenal was discovered some months ago in the neighborhood of Chatham, England, believed to have been used by cavemen millions of years ago. Two local men made the discovery about sixteen months ago, and since then about four thousand hammer stones, flint axes and scrapers, and other worked flints, have been taken out of the dump. The tools and weapons, although they belong to the earliest period of the Stone Age, are wonderfully efficient. Some of the edges are still almost as keen as razors.

The Softly Flared Silhouette

The matron has her "innings" in this season's fashions, for all clothes are extremely shapely, and many of the most important details happen to be those with a slenderizing effect. This is true of the model pictured here, developed in one of the small all-over floral crepes. The bodice has a center-front opening with gathers at the shoulders, and is joined to a circular skirt front having an inverted plait. The back is in one piece, flaring at the sides, and has a narrow belt. The sleeves are long and gathered into wristbands. No. 1326 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 bust requires 3½ yards 39-inch material. Price 20 cents.

A Health Item Of Interest

A New and Effective Method of Promoting Health

It will be good news to our readers that they now have available a most effective means of promoting health in the home by eliminating the diseases that are transmitted by flies and mosquitoes. Filt, the remarkable insecticide which has been perfected by the Standard Oil Company of N.J. is now obtainable in Canada at almost any drug store, hardware store or grocery store.

For years the research laboratories of the Standard Oil Company of N.J. were engaged in developing a type of insecticide that would be clean, safe and easy to use.

At last their expert entomologists and chemists succeeded in perfecting a thoroughly scientific product superior to the old methods of killing insects, in that it kills all of them that come anywhere in the neighborhood of the application of the spray, and that is very quick and sure in its action.

Having found this wonderful answer to the insecticide problem, they called it "Filt," and under this name it has attained a huge sale in the United States, and is in fact widely recognized as an aid to home health, by reason of those qualities which make it sure death, not only to flies and mosquitoes, but also to moths, ants, bed bugs and roaches. This wonderful product is now on sale in all parts of Canada.

Sprayed into cracks and crevices where insects hide and breed, Filt will not stain the most delicate fabrics. The re-introduction by the Russian

An added advantage is that Filt will not stain the most delicate fabrics. This has been proved by extensive tests.

Wins High Art Award

Armless Japanese Girl Carried Off Honors in School Exhibition

A Japanese girl, handicapped by the loss of both arms, but possessed of great courage, astonished Tokio art circles by carrying off the honors of the Peeresses' school exhibition. Holding specially constructed brushes between her teeth, Miss Yonoko Yamaguchi, the armless artist, has for several years painted oil, the decorative sash worn by all Japanese women. Some of her work at the exhibit sold for as much as \$500.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine oil ready is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Plans Aerial Expedition

Engineer Antonio Pauly, of Buenos Aires, has presented to the ministry of the navy plans for an Argentine aerial expedition to the South Pole and an extensive scientific exploration of the Antarctic continent.

A coward is a man who knows he is wrong and refuses to admit it.

All men are equal before the law, but not before the mother-in-law.

ON THE AIR

What is Doing in the World of Radio

There has been quite a boom in wireless sets in Paris since the general strike in England, especially among English-speaking residents who used them to get their strike news.

Many persons are suffering from radio deafness because they listen for many hours without removing the ear phones. "An ear specialist advises the use of loud speakers.

Con.—The radio will never take the place of newspapers.

Denser.—Why?

Con.—You can't start a fire or line a carpet with a radio set.

Many broadcasting stations are now making public their advertising rates. One United States broadcast station has a rate ranging from \$30 for a quarter of an hour during the day to \$120 for one hour at night.

Tauligne, the famous priest and scientific electrical engineer, who is noted in France for his inventions as well as his sermons, has just completed what he claims is the first really perfected loud speaker for crystal sets.

Air conditions for radio are best in February, the next best months being March, January and November.

Commercial wireless service inaugurated at Rio Janeiro, Brazil, is in touch with London, New York, Paris, Berlin and Rome.

Sonia Radina, radio artiste, has insured musical manuscripts for \$100,000. She spent four years living with the peasants of Europe, listening to their folk songs and copying them by candle light. She uses these manuscripts for her radio concerts.

Electric power men from all parts of Wisconsin have pledged themselves not only to eliminate power line interference of radio reception, but to assist the radio set owners in finding the source of much of the other outside troubles such as violet ray machines, X-rays and such.

When a radio receiving license is granted to a listener in Japan, his set is tuned to the wave length of the Tokyo Municipal Broadcast Station and then sealed so that no other station may be tuned in. It is reported that this is done in order that no radical ideas can be picked up if put on the air by secret broadcast stations.

Many people have the mistaken notion that the resistance of headphones is a measure of their quality.

By, radio headphones of 2,500 ohms resistance may be much better than others of 5,000 ohms resistance. The resistance is determined by the length, size and kind of wire used in their construction. Their performance is a matter of proper engineering design and the use of good materials.

The Oil for the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

World's Poultry Congress

The Belgian minister of agriculture has named official representatives to the World's Poultry Congress at Ottawa, July 27 to August 4, 1927. They are M. Maenhout, member of the House of Representatives, and president of the National Federation of Poultry Societies of Belgium, Lemberge; M. Pulluckx-Eeman V., editor in chief of the journal Chasse et Ueche; and M. Heyndrickx, Ach., 4 Chaussee de Bruxelles, Ledeberg.

To Develop More Power

Two million dollars will be expended by the Winnipeg Electric Company and its subsidiaries in making the necessary provision to obtain and utilize power from the hydro-electric plant at Great Falls during the next eight months, it is announced. A considerable proportion of this expenditure will be represented by large power machinery, it is stated.

OUR CROSSWORD PUZZLE

Horizontal

- 1—Stop.
- 5—Become excited, puff up.
- 10—Astral body.
- 14—Old world plant ofilly family.
- 15—A tooth.
- 16—Tune of air.
- 17—480 sheets of papers.
- 18—Variegated w a x y quart.
- 19—Repair.
- 20—Game played in howling alleys.
- 22—Cast into the shade.
- 24—Period of time.
- 25—Brownish color.
- 26—Brackets ur angle.
- 30—Long eaters.
- 34—Single thing.
- 35—Having ears.
- 37—Tax or tribute (Dial).
- 38—Consumed.
- 39—Breach.
- 40—Hasten.
- 41—Be split or rent.
- 43—Mended.
- 45—Froth.
- 46—Makes deeper.

Vertical

- 1—Male of the red deer.
- 2—To the lee side.
- 3—Borrow.
- 4—Storm.
- 5—Issued from.
- 6—Huge pieces of timber.
- 7—The armpit.
- 8—Whip or tuft of hair (Scot.).
- 9—Built.
- 10—Money saved.
- 11—Snare.
- 12—Objectives.

- 13—Plant milled to the turnip.
- 21—Anger.
- 23—Latter.
- 26—Protect, watch over.
- 27—Loosen.
- 28—Sifting apparatus.
- 29—Wise men.
- 30—One affected with dread disease.
- 31—Ethereal fluid in veins of gods.
- 32—A water nymph.
- 33—Checks.
- 36—Crude.
- 42—Shoulder ornament of officers.
- 43—Scooped at.

- 45—Fronts of buildings.
- 47—Mistake.
- 49—Droll fellow.
- 52—Wearies.
- 53—Tidy.
- 54—Satisfy.
- 55—North American rail.
- 56—Fall to keep or maintain.
- 57—Story.
- 58—Girl's name.
- 59—Consider.
- 62—Jagged promontory.

SUNDAY SCHOOL LESSON

JUNE 13

JOSEPH'S FIDELITY

Golden Text: (See) thou a man diligent in his business? he shall stand before kings. Proverbs 22:29.

Lesson in Bible: Genesis 39:1-21.

Devotional Reading: Proverbs 22:29.

Explanations and Comments

Joseph Becomes House-Steward in Egypt, verses 1-6.—A band of Ishmaelites brought Joseph down into Egypt (see The Historical Background) and there sold him to Potiphar, Pharaoh's captain of guard. Owing to his personal charm (for he was comely and well-favored, verse 6), Joseph was taken into his master's house as a servant instead of being sent into the fields to labor. What a contrast from his life at home as the favorite son of his father and his free life in the open as a shepherd must have been his life in that Egyptian household! But Joseph was adaptable. In a short time his ability and trustworthiness—a token of God's presence with him—led Potiphar to make him the superintendent of his household, or house-steward. Potiphar's confidence in Joseph was so complete that he put everything into Joseph's hands, save his own food. The exception was probably due to the strict laws of caste in Egypt; see Gen. 43:34; 46:34.

"Character plus capacity plus charm always makes its way." "The Lord made all that he did to prosper. There is no hint of miracle here. Providence works from within outward, as well as from without inward. God honors trustfulness. If you are sure that you are in the hands of the God above, and under his guidance, you have a quicker eye and a steadier hand for the affairs of this life. Prosperity inevitably follows" (R. C. Gillie).

Prisoners Returned After Holiday

A check-up shows that all the prisoners of the jail at Tucuman, given their freedom for a day on the occasion of the anniversary of Argentina's independence day, returned to the jail.

Answer to Last Week's Puzzle

Piracy Is Still Practiced

But Is Most Common In Oriental Waters

That pirates still exist is evident by the action taken in Switzerland at one of the League of Nations meetings. It provided for an agreement that warships of any nation may chase pirates into the territorial waters of any other nation. The pirates then will be tried in the country in which they are captured. This action came about in codifying international law and the suggestion on piracy came from a Japanese minister. It is apparent piracy is more common in Oriental waters.

Woman's love for ribbons may be accredited to her having originated from a rib.

Flesh Wounds.

Apply Minard's freely. It removes all the poison and allows the wound to heal quickly.

TIPPITY-WITCH IRENE

HE STARTS WHERE THE RADIO QUITS

By COLLEEN MOORE

Parliament Now Entering On The Last Round Of A Busy Session

Ottawa.—Parliament is entering upon its last but busiest fortnight unless unexpected fields are to be explored. With much of the work-a-day business of the session still before it, the house is tentatively pledged to adjournment about June 25, and with all sections of the house anxious to bring on, prorogation, it is probable that the order paper will be cleared within that time.

In the house itself, this week will see, most probably, a full dress debate on the vote of \$3,000,000 for continuation of the Hudson's Bay Railway construction, provided for in the main estimates. There are also many estimates to be passed in committee of supply, and final readings of the bills to give effect to the budget proposals. Supplementary estimates also may be before the house within a few days.

Most of the government's legislation has been introduced and advanced a stage or two. One new bill is to be introduced dealing with titles to water in the railway belt of British Columbia. The minister of the interior has not yet indicated exactly what lines the bill will take.

The customs probe will finish its public sittings before the week is done, unless new fields are opened up. The report of the committee which has been investigating the conduct of the customs department since February 9, will probably be presented to the house itself early this week. It will be the most important matter before the house in the last few days.

One possibility is that the government may make some announcement regarding the Canadian ambassadorship in Washington. A vote for this purpose has been included in the estimates for several years and will have to be passed again by the two houses. No appointment has been made but it is understood that it is imminent.

Higher Favorable Trade Balance

Canada's Excess of Exports Over Imports Greatly Increased

Ottawa.—The favorable balance of trade (the excess of exports over imports) was more than 600,000 in the 12 months ending April 30, 1925.

This is nearly \$100,000,000 more than in the 12 months ending April 30, 1924.

In the 12 months ending April, 1925, domestic exports were \$1,315,000,000; imports \$736,000,000. The excess of exports over imports was \$579,000,000.

In the 12 months ending April, 1924, domestic exports were \$1,080,000,000; imports \$795,000,000. Excess of exports over imports \$285,000,000.

Calgary Candidates

Calgary.—For the five members to be elected by proportional representation in the city of Calgary, Liberals decided to place three candidates in the field. On the first ballot they chose R. C. Marshall, sitting member of the legislature, Mrs. Nellie McChung, author and lecturer, member of the legislature last session for Edmonton, and Mayor George H. Webster.

Missing Evangelist

Los Angeles.—The Los Angeles Times says it has learned through confidential, but thoroughly reliable, sources that Mrs. Minnie Kennedy, mother of Alcee Semple McPherson, missing evangelist, is negotiating with two men who declare they will return Mrs. McPherson for the \$25,000 reward recently offered by Mrs. Kennedy.

Says Time Has Come To Abolish All Appeal To The Privy Council

Winnipeg.—Although saying that the privy council had generally discharged its high and difficult duties with ability, knowledge, skill, impartiality and rectitude, J. B. Coyne, K.C., in an address at the gathering of the members of the Manitoba Bar Association here, declared the time had come when Canada should follow in the footsteps of Australia and South Africa, abolish all appeal to that tribunal, and make the Supreme Court of Canada the last resort for Canadian litigants. He stressed the need of knowledge of climatic, social and business conditions on the part of the judges as a necessary equipment of

No Action On Cattle Tariff

U. S. Legislation Not Possible Before Next Congress Meets

Washington.—Talk here in reference to the cattle tariff, growing out of Hon. W. R. Motherwell's statement to the House of Commons at Ottawa, is that there is no likelihood of any change in the present situation in the near future. It is pointed out no legislation is possible before the seventeenth congress, which will be elected next November, but will not meet in regular session for a year and a half.

So far as the flexible tariff is concerned officials of the tariff commission point out there is nothing formal before them on cattle rates. While there has been agitation by some livestock interests on this side to let down the bars as to feeder cattle other livestock interests are fighting the proposition. With a congressional campaign on and with the agricultural situation in the middle west, northwest and south unsatisfactory there is little or no prospect, it is felt here, for opening up the cattle tariff question.

Obtain Weapons Too Freely

Are Too Many Permits Issued To Carry Arms

Ottawa.—"Too many people at present have the power to issue permits to carry arms," declared Commissioner Starnes, of the Royal Canadian Mounted Police, in testifying before the senate committee which considered Senator Belcourt's bill to restrict the importation, manufacture and sale of weapons in Canada. The measure proposes that license must be obtained for the importation, manufacture and sale of weapons.

Neither justices of the peace nor sheriffs should have the right to issue permits," Col. Starnes said.

The committee will meet again at the call of the chair.

To Raise New Loan

Domestic Loan Not Exceeding

Ottawa.—The loan which the government will soon be sought from parliament by Hon. J. A. Robb, minister of finance. The loan is for the purpose of paying, redeeming or otherwise retiring the whole or any part of loans or obligations of Canada and for public works and general purposes. The Dominion Government has \$35,000,000 in two-year notes maturing October 1, and \$5,000,000 in two-year notes maturing November 15.

New British Trade Commission

A. E. Pollard, of London, Coming to Vancouver

Montreal.—F. W. Field, the British senior trade commissioner in Canada, announces that A. E. Pollard, of the department of overseas trade in London, Eng., has been selected to fill the post of British trade commissioner at Vancouver rendered vacant by the recent promotion and transfer of L. B. Beale to Wellington, N.Z.

Is Not Joining Laborites

London.—Former premier Lloyd George, parliamentary Liberal leader, whose differences with Lord Oxford and Asquith have shaken the Liberal party, has written a public denial of the report that he sought to join the Laborites.

Protest From Livestock Board Say Prisoners Of War Were Killed

Open Letter Is Sent To the Minister of Agriculture

Winnipeg.—The board of directors of the Winnipeg Livestock Exchange has sent an open letter to Hon. W. R. Motherwell, minister of agriculture, in opposition to what is termed in the letter "propaganda" published to the effect that the livestock exchanges regulations on the western markets are opposed to the marketing of co-operative shipments of livestock and the pooling of livestock.

The letter states that the exchange had wired the minister asking if he had been correctly quoted in recent interviews and that the following reply had been received from Mr. Motherwell:

"Gave no formal interview re matter referred to, but did draw to attention of press men that co-operative marketing in west had now become so general and popular that at present stockyards regulations did not permit farmers pooling their livestock sales legitimately, then it might, and possibly would, be desirable to change such regulations."

The letter says the exchange "would be pleased to be advised by you just what regulations oppose the marketing of co-operative livestock or the pooling of livestock."

The letter points out that practically all exchanges in the west operate under the same regulations; that if there are any regulations prohibiting the practices named, that the exchange would assist in removing them "for good business reasons." In regard to the latter it is stated that such regulations would affect all the commission firms operating on the Winnipeg exchange.

Says China Resents Foreign Interference

Geneva Representative Becomes Excited At Meeting of Opium Commission

Geneva.—China is sick to death over foreign interference in her domestic affairs.

Mr. Chu, the Chinese minister to Italy made this declaration during a tempestuous session of the permanent opium commission in a violent altercation with the British delegate, Sir Malcolm Delevigne.

Sir Malcolm had criticized the importation of morphine into China.

He talked of the readiness of the Chinese to make war on Great Britain if you can find a Chinese who is not anti-foreign and not anti-British, I'll say he is not a good Chinese," exclaimed the minister.

The word battle became so heated that M. Rougeolle, president of the commission, was obliged to adjourn the session.

Foot and Mouth Disease

London.—The foot and mouth disease of cattle is brought into England in the carcasses of pigs imported from the continent by British factories which cure the meat of the pigs. Rt. Hon. Walter Guinness, minister of agriculture and fisheries, made this statement in an address to the council of agriculture of Middlesex County at the Guildhall.

Collides With Iceberg

St. John's, Nfld.—The British freighter Inverton, from Montreal for a European port, was reported making back to St. John's, with her bows stove in by collision with an iceberg.

Three Life Savers On World Cruise

Photography ranks among the most popular of the many pastimes on board ships making cruises around the world. Under sunny skies and with perfect weather conditions, not many can resist the lure of the little black box which magically reproduces striking likenesses of places and people. Soon after breakfast an army of amateur photographers appear on the scene prepared to "shoot" anything in sight, providing the interest is good enough. Tourists feel that nothing brings back happy memories of pleasant travelling days so succinctly and sharply as pictures.

Above, from left to right are Miss Dorothy and Miss Marjory Hager, of Vancouver, B.C., snapped on the deck of the Canadian Pacific liner Empress of Scotland, while making the Round-the-World Cruise this year. The Misses Hager with the round disk form a trio of life savers.

Spanish Want Rifman, Leader Tried By Court Martial

Fez, French Morocco.—Thad 22 officers held prisoner of war of Abdel-Krim did not die of typhus, as was reported, but were shot, bayoneted and clubbed to death by Krim's soldiers during the last days of the Rif defence, is the charge brought by Spanish investigators.

Their finding is based on accounts given by Spanish privates and non-commissioned officers, who were servants of the Spanish officers in the Rif prison camps.

It is expected that the present inquiry will be followed by a formal demand from Madrid for an official investigation, with the object of bringing Abdel-Krim before a military court martial on charges of inhuman cruelty to Spanish prisoners of war.

It is learned that the Spaniards do not seek the death penalty for Krim, but prefer to have him sentenced to a long term of confinement in some Spanish military prison.

Methods Of Smugglers

Goods Are Rolled Across the International Boundary Line

Ottawa.—Smuggling methods along the international boundary at Rock Island and Beebe, Quebec, were described before the customs investigating committee. The two points both touch the international boundary. For half a mile or so the international boundary runs down the middle of the road which connects them.

A customs preventive officer who was sent down to Quebec told of small sheds termed warehouses, being established just on the Vermont side of the line. American goods would be consigned there and then just "rolled across the line" when convenient.

"They just throw them across?" questioned R. L. Calder, committee counsel.

"Yes," said the witness with a smile.

Cure For Leprosy

New Treatment Devised Meets With Great Success

Berlin.—A new treatment for leprosy has been devised by Prof. S. Paldrock, of the University of Dorpat, Estonia, who in an article in the German medical journal writes: "The notices that after many years of experimentation, he had succeeded in killing the leprosy germ by means of freezing."

Carbolic acid "snow" was applied to diseased tissue with the results that of 16 patients treated, seven already have been discharged as wholly innocuous to society, the article said.

Control Beer Sale

Winnipeg.—The Manitoba Liquor Commission has taken control of the distribution and sale of beer in the province under an official order. The commission announced that hereafter beer must be purchased from the commission's offices situated in Winnipeg and various towns in the province.

Will Not Be Candidate

Edmonton.—Ex-premier Herbert Greenfield has announced that he will not be a candidate in the Alberta general election June 28. He expects to take an active part in the campaign, addressing meetings on behalf of the U.F.A. candidates.

Question Of Independence Of Canada Is Now The Subject Of Discussion

War On One Big Union

Winnipeg Mayor Says Means Must Be Found To Dislodge Organization

Winnipeg.—Open war on the One Big Union with a view to its ultimate extermination, was declared by Mayor R. H. Webb, of Winnipeg, in addressing the annual meeting of the industrial development board here.

The organization, which is regarded as the left wing of the labor movement, has its headquarters in Winnipeg.

Mayor Webb declared some means must be found to dislodge the O.B.U., which, he charged, was "undermining progress and development in the city." He criticized the federal authorities for granting the street railway-men's union of the organization a board of conciliation in an effort to settle the present deadlock between the Winnipeg Electric Railway and the men.

The traction company has refused to recognize the union or negotiate a new agreement with their employees who are affiliated with the O.B.U.

Many Injured In Gas Main Explosion

Weak Seam Given As Cause Of Accident In Los Angeles

Los Angeles, Calif.—Nine persons were injured, some seriously, when a sixteen-inch gas main exploded in the crowded east side of the city.

With a roar that could be heard a mile distant, the blast ripped a gaping hole in the pavement 160 feet long and 15 feet wide, and piled the remains of three buildings into a dusty, smouldering heap.

Six pleasure cars and three trucks, which were passing, were lifted high into the air and dropped, demolished and burning, into the great hole.

Damage in excess of \$200,000 was estimated by police. It is believed, however, that losses will exceed that figure.

A weak seam in the big main was given as the cause of the blast.

Tidal Wave In Burma

Death Toll Has Reached A Total Of 2,800

Rangoon, Burma.—The death toll of the recent cyclone and tidal wave on the coast of Burma has reached a total of 2,800, according to a report submitted by the commissioner of the district of Arakan.

It is feared that the total number of deaths may reach almost 4,000 in the affected regions.

Large property loss has been suffered through the area which was swept by the gigantic death-dealing gale. Residents fled hurriedly from their homes in a desperate but often vain effort to escape the pursuing death, and they left their personal effects behind.

Relief work is progressing as well as possible, but it is said to be totally inadequate to meet the present situation.

Arrest U. S. Diplomat

Honolulu.—A special dispatch from Tokyo to Hochi Shu, Japanese newspaper here, says that O. K. White, a member of the United States embassy staff in the Japanese capital, was arrested while taking photographs in the Sasebo naval base.

Britain Sends Warship To Alexandria To Protect British Interests In Egypt

London.—With a ministerial crisis pending in Egypt and having in mind the acquittal of the alleged assassins of Sir Lee Stack, British Sirdar of the Egyptian army in 1924, Great Britain has informed the Egyptian Government that it reserves "complete liberty of action."

The British Government is backing up this notification with the dispatch to Alexandria of a warship from Malta, denouncing this, however, as merely a precautionary measure for the protection of British and foreign interests.

The most important question at issue is the Egyptian premiership, which recent reports asserted was likely to be taken over by Zagloul Pasha, leader of the Nationalist party, whose partisans in the late elections carried 4

Ottawa, Ont.—Has Canada a status of independence today? If not, will Canada become independent? And is independence to be desired?

These questions were placed before Premier King and Mr. J. S. Ewart, "eminent constitutional authority," as reflections from the disagreement between Premier Hertzog, of South Africa, and Sir James Parr, high commissioner for New Zealand, caused by the former's recent speech before his house of assembly at Cape Town.

Premier King reserved his opinion for pronouncement in the House of Commons at another time, but Mr. Ewart, as a student and recognized interpreter of constitutional questions, was able to discuss the subject in interesting details. In brief, he agrees with Premier Hertzog as to the desirability of an independent status but disagrees with him as to his present existence.

Premier Hertzog's expressed view was that the dominions have enjoyed independence established by the peace treaty of Versailles and that they now are retrogressing by surrendering this independence for an inferiority which threatens the unity of the empire. Sir James Parr criticized this view by declaring in London that there is no support for increased status and that New Zealand is content with present conditions.

Premier King, questioned in his dual role as prime minister and secretary of state for external affairs, said that the controversy is not one in which Canada should be officially involved.

"The fact that the premier of South Africa and the high commissioner of New Zealand have already disagreed," he explained, "is a good reason why I should express no opinion. It is not a wise subject for official controversy, and any statement I make regarding it must be made on the floor of the house."

Mr. Ewart's views on the three introductory questions put before him might be summarized as follows:

Canada has not a status of independence today; Canada is approaching independence every day, and will become independent by demanding such status; independence for Canada is desirable.

Is Offered Post Of Governor-General

General Opinion Is That Lord Willingdon Has Accepted

It is now officially admitted that Lord Willingdon has been offered the governor-generalship of Canada, and it is generally believed he has accepted the post. He will return home from China shortly, by way of Canada. The reason of his going to China by way of the Dominion was that he might sound out whether or not he would be an acceptable nominee for the position.

Labor Conditions In Orient

Geneva.—Eighty-three thousand Japanese women work in the mines and 48,000 of them labor in the darkest depths, Japanese representatives told the International Labor Conference here.

This admission followed an assertion of Miss Margaret Bondfield, English labor worker, that working conditions in Japan, China and India were "intolerable."

Pole Flights Have Boosted Aviation

Polar Flights Should Stimulate Use Of Aircraft For Commercial Purposes

In the third installment of his vivid account of his flight from Spitzbergen to the North Pole and back in an aeroplane, Lieutenant-Commander Byrd asserted that, while he regretted not to have discovered land, one thought compensated him and his pilot, Bennett, while wrestling with difficulties and facing dangers, namely, that "business need no longer hesitate to take up aviation with a bang."

Commander Byrd was not mistaken or unduly optimistic. His feat is certain to advance commercial aviation.

Amundsen, flying over the pole in the dirigible Norge, had ample opportunities for exploration. It is estimated that he and his companions explored about 60,000 square miles in their flight from Spitzbergen to Teller, Alaska, allowing them a field of vision averaging fifty miles. The crew of the Norge saw no land. They may have established the fact that there is no great body of land in the 1,000,000 square miles of the previously unexplored Arctic area.

The possible existence of small islands or volcanic peaks on either side of the path of the dirigible in that area is admitted. Other explorers will continue the valuable work of Byrd and Amundsen and remove all doubt as to that not unimportant point.

Like Byrd, Amundsen may well entertain the hope that his epoch-making flight will stimulate the use and improvement of aircraft for commercial purposes. The question of protecting the dirigible from pieces of ice broken from the structure and driven back into it by the propeller blades will demand serious attention. The danger from that bombardment, not sufficiently realized by the builders of the Norge, might have caused disaster.

A dirigible is a frail craft and in the Arctic regions good fortune is rather the exception than the rule.—Chicago Daily News.

Sultan Of Morocco Has Peculiar Hobby

Is Intensely Interested In All Kinds Of Mechanical Devices

The Sultan of Morocco has made mechanical devices his royal hobby. Trick blocks, motor boxes and bicycles are the favorites.

Among his recent acquisitions is a set of six six-cylinder engines made in Italy and the sultan has ordered that they be used to make out

especially on his order at Zurich for use at diplomatic functions. Each chair plays a different national anthem when sat in. One plays "The Star Spangled Banner," another "God Save the King," another "The Marseillaise," and the other three play the national hymns of Spain, Italy and Germany.

The chairs have a special attendant, whose duty it is to see that the right diplomat sits in the right chair.

The sultan also has bought five motor cycles, three for his sons and two for the sons of his deposed brother. In addition, he has purchased ladies' bicycles for his younger wives, two electric player pianos and a number of Swiss mechanical clocks, one of which sends a miniature train from a roundhouse to make a tour of the room on a miniature track every hour and one-half.

He also has acquired a bright red hansom cab done in complete vermillion lacquer, fitted with silver trappings and purple harness.

Training Begins At Home

Children Properly Brought Up Seldom Get Into Trouble

More statistics, gathered from juvenile court records, show this: Children who come from homes where there are Christian influences, where there is regular attendance at day school, where there is an effort to discharge the full obligation of father and mother, very seldom come to court. In the majority of courts such cases are so rare as to be practically non-existent. That means something—the crime wave, if it is to be checked, must be stopped at the start, and the home is the one place to stop it. The country is paying the price for taking down the homey old motto that used to be worked in colored yarn, "God Bless Our Home," and putting up in place that modernism, "Let's Go."—Stratford Beacon-Herald.

Ant Has Marvellous Brain

Barwin declared that the brain of an ant is one of the most marvellous atoms of matter in the world—perhaps more marvellous than the brain of man. Ants can hear sounds and see light, for which the ears and eyes of man are not fitted, and they have wonderful means of communicating with one another.

It is the people who come early to avoid the crowd who make the crowd.

W. N. U. 1632

Young Scotsman's Opinion

Tells of Advantages of Agricultural Instruction in Alberta

H. Macpherson, a young Scotsman, who was among the first group of boys from the British Isles to study agriculture in Alberta at Vermilion School of Agriculture, writes in part as follows of his experiences in Alberta, in the Striding Journal, from his farm at Mirror, Alberta:

"I just wonder if you boys are content to stop at home when there are wonderful chances in Canada waiting for you. As you are no doubt aware, Western Canada is noted for farming, grain and dairy produce, and there are immense tracts of land awaiting cultivation. Why not come to Sunny Alberta and go in for farming?"

"To any who are considering this step, I will give some useful information. In the first place, I would advise studying farming conditions in this country at any of the three agricultural schools in Alberta—Vermilion, Olds or Camrose. As my experience has been gained at Vermilion, I will describe that school, though the other two are identical with Vermilion. The session starts on or about 25th October and finishes on the 25th March. Even though a student on commencing has absolutely no knowledge of farming, he leaves the school with valuable knowledge which will stand him in good stead when he starts farming on his own. Team work (driving horses), cow barn work, feeding the stock, blacksmithing and carpentry, instruction in use of farm implements, and lectures on farm mechanics, farm management, soil chemistry, dairying, etc.

"Nothing is omitted, and at the end of the term, the students are placed on suitable farms, personally selected by the principal of the school. The tuition is quite free, but the student is required to furnish money for his board during the five months, \$155, and also money for personal use. There are plenty of social activities at the school—dances, skating parties, hockey games, literary activities, etc. Suitable accommodation is provided for students at houses in town, these being personally selected by the principal."

Providing Shade For Fowl

Possible For Them To Get Too Much Sunshine

Fowl love the sunshine. It is the best tonic they can possibly get, but it is quite possible for them to get too much of it. The introduction of the Russian sunbather to the cities, towns and villages pleases much of this good thing. When summer comes the hot sun beats down from early morning until late evening, and unless something in the way of shade is provided the fowl will suffer severely.

Most poultry houses face the south. In many cases the run is in front of the poultry house and the building itself provides little or no shadow into which the fowl may go. Poultry keepers should study the situation in their hen runs. There should be a shady spot somewhere for the hens at all hours of the day. If shade is lacking provision should be made so that this will be provided.

By early planting of sunflowers and artichokes outside the wire fence of the run these large leafed plants may be grown before the summer is here. Both grow to good heights and, if planted fairly close together, will cast a heavy shadow. They are useful on the east, west or south of a run fence. To the north they would be useless as their shadows would be cast in that direction. Don't neglect this aid to the comfort of the fowl. Fowl that have their comfort looked after keep well and lay well.

Had A Good Reason

Logical Excuse of Bachelor For Making Long Pie

Dr. Harvey W. Wiley, the food expert, ended a eulogy of rhubarb with an anecdote.

"There was a bachelor mason in my native Kent," he said, "who used to cook his own food, and one day he came to work with a pie over two feet long fastened to the top of his lunch basket."

"What have you got there, Joe?" the boss asked him.

"A pie. What do you think?" said Joe.

"But look at the length of it," said the boss.

"Well," Joe growled, "the rhubarb was that long."—Chicago Daily News.

Salesmanship Plus

At the motor show the salesman was endeavoring to interest a girl in a smart little two-seater on the stand. "Ifas it got every modern improvement?" she inquired.

"Everything, madam," he responded gallantly; "the only thing it lacks is a beautiful owner."

He sold it.—Youth's Companion.

The majority doesn't always rule. One bad little boy sometimes gets a dozen good little boys into mischief.

Just Need Fair Excuse

Divorce Among Bush-Negroes of South America Very Simple

Marriage in the jungle among the Bush-Negroes of Surinam, is not an elaborate performance, says John W. Vandercock in an account of his last visit to the northern coast of South America, in the May Harper's Magazine. He writes:

"Bush-Negro girls usually marry for the first time when they are 15 or 16, but this first love is by no means the last. The Bush-Negroes consider women as the fickle sex and have patiently provided for their whims. Or perhaps the matriarchs themselves created the system. A woman may leave her husband at any time if she has what public opinion admits to be a fair excuse. If her husband is lazy, a poor provider, or simply dull, that is ample reason for him to be deserted.

"The divorce is quite simple. The lady either locks her front door or moves. In the first case the husband no longer has right of entry to his wife's abode. The house where she lives is, and has always been, her house. It belongs to her family. The husband heretofore has come and gone freely, but now that he is barred he may no longer trespass, even though he has erected the hut with his own hands for the use of the bride! But the husband still has his own house which he has used during the marital period as a storehouse for his most treasured possessions. It is his 'haven.'"

Ownership of the Pole

Contents That the North Pole Is International Territory

If observations of Captain Amundsen and Lieut.-Commander Richard E. Byrd are correct, and there is frozen open water at and around the North Pole, then the North Pole is international territory, in the opinion of A. B. Clute, lecturer in law at the University of Toronto.

The question of ownership of the pole is brought up by the application for admittance into the United States, duty free, of films taken at the North Pole, on the ground that they were made on United States territory.

Manitoba Honey Production

Honey production has now become a recognized phase of mixed farming in Manitoba, and production figures for the past few years have shown a steady increase. Last year over 4,000,000 pounds of honey were produced in the province, having a value of \$600,000. The latest statistics on this industry show that the province has 2,000 beekeepers, with 27,000 registered hives.

The Last Thing

The Vicar: "Fancy Mr. Jones going into a room which strongly smelt of gas with a lighted candle? I should have thought it would have been the last thing he would ever do."

Mrs. Jones: "So it was, sir."—Popular Science.

Patriotism

True Patriotism Nurtured Almost Of Its Own Accord

Patriotism is not a thing that can be bought nor can it be forced into people without its nature undergoing a chemical change in the process. When it is so forced in, it becomes as much of a drudgery as compulsory drill or enforced churchgoing. True patriotism is something that sprouts almost of its own accord. It is nurtured by gratitude, not by favors received at the hands of a privilege-bestowing government—by equality of justice. Given these things in America and the democratic faith is saved.—N. Y. Nation.

Nightly Sleep Series Of Naps

Experiment Shows Restlessness After Every Eleven and Half Minutes

The eight hours of sleep which the human being allots himself nightly is a series of eleven-minute cat naps, psychologists were told recently by Prof. H. J. Johnson, of the Mellon Institute, Pittsburgh. He presented the findings of experiments made with sleeping persons whose rest was recorded by apparatus attached to a hanging bed on which the subjects slumbered.

The average rest period of the subjects was eleven and a half minutes. After that length of time the sleeper jolted, rolled over, changed his position, and relaxed again for eleven minutes and a half more.

Upsets A Popular Belief

Statistics Show Men Are Greatest Consumers of Candy

The popular idea that flappers and children are chief consumers of candy went overboard at the tenth annual convention of the Associated Retail Confectioners of the United States at Chicago.

"Close observation," said the statisticians of the association, "establishes the fact that men not only do most of the candy buying, but they do more than half the eating."

"Ever since the days when the aborigines of Central America used the cocoa bean for currency man has been the greatest patron of the confectioner," it was stated.

A Thousand Years Hence

Our clothes of the future will be so equipped that while men are, for instance, enjoying themselves dancing at night they will be absorbing energy from the ether. In the thanks to the evolution of the radio, this will not be dissipation at all, but a night spent in such a way will be fully as refreshing as eight or ten hours in bed.—Washington Herald.

What Solomon Escaped

If there had been automobiles in the days of Solomon, think of the trouble the old gentleman would have had with 500 wives on the back seat telling him how to drive.—Water-ton, N.Y., Times.

Plant Lice

Plants Infested Should Be Sprayed With a Contact Insecticide

Cabbage, turnips and other vegetable crops, as well as many plants in the flower gardens, are often seriously injured by plant lice or aphids. There are many different kinds of these plant lice in Canada. Some are green, other dark colored, and some red. They are all sucking insects and live solely on the juice which they extract from their host plants. Some kinds feed on the under side of the foliage, others cluster on the stems of plants, and others again are found attacking the roots. Plants should be examined at frequent intervals and when the insects are first noticed they should be sprayed with a contact insecticide such as kerosene emulsion, whale oil soap, or a tobacco preparation. Trade preparations of nicotine are sold by all seedsmen. Whale oil soap is used at the rate of one pound to four gallons of warm water for black aphids, and one pound to six gallons for green ones. To make kerosene emulsion, use two gallons of kerosene to one gallon of water and half a pound of soap. Heat the water and dissolve the soap in it, then pour in the kerosene, churning violently until a thick creamy emulsion is produced. This makes a stock solution which cools into a jelly-like mass. When required for use, dilute with nine times its measure of warm water. The insecticides must be applied so as to reach the places where the insects are clustered. Only the plant lice which are actually hit by the spray will be killed.

Surplus Of Women

Claim There Are 2,000,000 More Women In Britain Than Men

Great Britain has a surplus of 2,000,000 women over men, many of whom are anxious to come to Canada, said Miss Rachel M. Ard, O.B.E., J.P., member of the Kent Migration Committee, in an interview at Montreal.

For the past 17 years Miss Ard has been working in England in the interests of Canadian settlement. She is going west where she will spend the next four months and a half studying Canadian conditions. Miss Ard has lived in Alberta and British Columbia.

Decline Of Conversation

There just doesn't seem to be any time for conversation now. It used to be Wickham's most popular recreation. It is now run over by the automobile overshadowed by the movie, drowned out by the radio, crippled by the gramophone and just generally relegated to a rear seat along with every other thing else which used to count. Amount of leisure to live.—Wichita Eagle.

Selection Not Appropriate

Restaurant Manager (to orchestra conductor):—"I wish you would dis play a little more tact in choosing your music. We've got the National Association of Umbrella Manufacturers here this evening, and you've just played 'It Ain't Gonna Rain No More.'"

Marquis Wheat Won The War

Says Development of Famous Wheat Had Bearing on Success of Allied Cause

The vexing question, "Who won the war?" has been answered by the Standard, a leading English newspaper in Buenos Aires, Argentina. Recently the Canadian Seed Growers' Association shipped 2,000 bushels of pedigreed Marquis wheat and 2,000 bushels of pedigreed Banner oats from Moose Jaw to a seed firm in Buenos Aires.

In an editorial commenting on the wheat shipment the Buenos Aires Standard states:—

"The next notable visitor to these shores will be Marquis wheat. The announcement comes from Canada, where the distinguished traveller, 2,000 bushels of him, has embarked for Argentina. The question has often been asked: Who won the war that made the world safe for democracy? Some say Joffre, many more say Foch, and not a few say French and the Old Contemptibles. But history will do 'Marquis wheat' justice. 'Tero, al grano.' Marquis wheat is not to be found in the peacocks. It is, briefly, a special sort of wheat, selected and sorted by an observant Canadian farmer, a Dr. Saunders, in 1903. Little did that gentleman think that, 11 years before the greatest war that ever was seen, he had won it on his homestead in Ottawa. Marquis wheat it was that fed the troops and the country behind them. From a single grain the wheat has grown to be the dominating crop in Canada and the United States. And now it is coming to Argentina. Will the city be decorated in its honor? Will there be a 'Te Deum' in the cathedral or a reception in the Casa Rosada? We think not, and yet the guest will probably do more for this country than any other since that stark warrior Juan Garay arrived on the scene."

Buttermilk For Growing Chicks

Buttermilk Extremely Valuable In Feeding Growing Chicks

Chicks receiving buttermilk made considerably larger gains than those receiving no milk in an experiment conducted at the central experimental farm. The chicks used were Barred Rocks and White Leghorns—all hatched on the same date. They were divided into two lots, receiving the same standard ration of feed. The chicks given buttermilk gained more weight than the other water-fed chicks. At the end of six weeks the chicks receiving buttermilk averaged 17.2 ounces in weight, while those receiving only water average 16.1 ounces. The mortality among those which had no buttermilk was more than twice as heavy as among the others.

These measures confirm previous experiments and indicate that buttermilk is extremely valuable in feeding growing chicks, both from the standpoint of development and of viability.

Ancient Burial Mound

More Remnants of Pre-historic Race Are Found in Florida

Remnants of a race believed to have existed in Florida 2,000 years ago, have been dug up in Broward county.

Near a burial mound was discovered an idol, thirty-five feet tall, made of sea mangrove, or "wood eternal," as it is called by those who consider it non-decayable. The features, seemingly those of a female, were carved from shells. They were also of the Mongolian type. The body was fashioned from wood.

Scientists found the burial mound about 500 yards from the Atlantic Ocean. It is one of the highest spots of the country and the site of the first white settlers who came to Florida.

May Have Been Appropriate

Singer Evidently Had Difficulty In Finding Suitable Selection

Dr. J. Ross Stevenson, preaching one Sunday in a western town, was asked by the soprano for his subject, so that she could select an appropriate solo to follow the sermon. When he hesitated she said, "Never mind; I'll listen carefully, and before you get through I'll have something selected." The sermon ended, then came the selection, "Sometime, somewhere, we'll understand!"—Methodist Recorder.

"Why do you feed every tramp that comes along," said the husband, peevishly. "They never do anything for you."

"No," responded his wife, "but it's some satisfaction to see a man eat a meal without finding fault with the cooking."

Big Farm Sold

What is known as the Kung Farm, of 2,560 acres, a short distance south of Grassy Lake, Alta., has been sold for \$115,000, which is an average of about \$45 an acre.

Historic Canada and New England Drawn Together

Chateau de Ramezay, former residence of French Governor-Generals of Canada, now a museum.

If Boston be the cradle of American history, Montreal and Quebec are no less that of Canada's. Strongholds of the ancient French regime, they were the headquarters of the planned soldiers of France in their battles against the British, and later the descendants of those same warriors took their place side by side with the British in the American Revolutionary war. From time to time, too, American soldiers found their way up into Canada and there was an interchange of hard knocks that was the best basis for the mutual respect and friendship that has grown up between the people of the Eastern States and Eastern Canada. Montreal teems with historical interest, reminiscent of the days of Indian warfare and the gallant struggles of a few settlers. With its wonderful location on the shores of the St. Lawrence, at the base of the beautifully wooded Mount Royal, and its delightful surroundings, the ancient French town offers to the tourist scenery unexcelled in few cities.

The rapid development of travel between these neighboring countries has necessitated greater facilities and the Canadian Pacific Railway and the Boston and Maine have come to an agreement whereby two fast trains will daily ply between Boston and Montreal with connections at the latter point with trains for Quebec. The service went into effect on April 25. The night train is called "The Red-Wing" after the red-winged blackbird, familiar to both New Englanders and residents of the province of Quebec, as the herald of spring. The name is well chosen because for the first time trains of Tuscan red Canadian Pacific cars will daily flash through the New England States. The northbound "Red-Wing" will leave Boston at 10.15 (11.15 daylight saving time), and will arrive in Montreal at 8.05 the following morning. The saving of time on this train over the old schedule is two hours and twenty minutes.

On trip from Montreal to Boston

Notre Dame Church, Place d'Armes, Montreal.

there is a saving of one hour, the train leaving at 8.45 p.m., and arriving at 7.10 the next morning. For those who wish to enjoy the beautiful scenery of the New England States there will be the day train, the Alouette, in English the Lark. This train will leave Boston at 8 a.m., arriving in Montreal at 7 p.m.; on the southbound trip it will leave Montreal at 9 a.m., and reach Boston at 8 p.m. the same day.

Strange, Romantic Love Adventures of the Flapper you know

Joanna

by H. L. GATES

Copyright 1925 by H. L. GATES

Published by arrangement with First National Pictures, Inc.

THE STORY THUS FAR

Joanna, pretty, ultra-modern shop girl, is informed by her employer, Graydon, that an unknown man has given her a million dollars to spend as she wishes. There are no strings to the gift—no conditions to meet—she is not even to know the name of her benefactor. She endeavors in vain to learn more from banker Eggleston, where she meets his nephew, Brandon, a man-about-town, who helps her write her first check and tells Joanna that he intends to make love to her. Dazed with the amount of money, hurt by the fact that her shop girl companions and the merchants with whom she deals, spending her new found fortune, believe her to have gone the limit in securing the money, she returns home that night expecting to meet John, her hopelessly "old-fashioned" girlhood sweetheart.

CHAPTER VI.—Continued.

"Miss Twain—seven" had become the slender waith of a lighthouse flowing, all perfume, softness and delicate color; beneath her milk wrap she shone vaguely grey; smart grey tailleur that fell straight from underneath her shoulders, but hugged her hips; skirt that dropped into straight lines without a touch of trimming or variegated pleats or colors; a thing that was infinitely and expensively "avenue"; grey sheer hose of a quality that echoed into the very souls of George and the rest! Slippers, slippers that were wondrous things of some skin with the sheen of grey velvet! A ravishing little hat, grey with a splash of scarlet at the side. George estimated the very simplicities of that hat as next door to being priceless.

A single flower, but that an orchid, nestled at Joanna's waist.

There was an immediate babel of voices, interrupted presently by the sharp reminder of an impatient customer that there were those with wants to be attended to.

"So you weren't fired after all?" George exclaimed when she had summoned her wits. "Here we've

been picking out the hymns for your funeral all day and you—you've pulled off whatever you've pulled off! Let the tidings loose, Jo! What's what—and who?" George's tone had dropped to the confidential level.

Joanna's eyes narrowed immediately. There were times when Joanna could remind one of a lynx. This was one of them.

"Drop the 'who' thing, George!" she warned.

George stared at her. "Well, for the love of—!" The girl on the other side of the counter, on the outside now, interrupted sharply:

"Yes, that's what I said. You're plugging in the wrong line!"

She heard Mrs. Adams' confusion. "Why, yes, I'll tell her you're asking for her."

She had intended to let "Mr. Good Morning" feast his eyes also, but suddenly she lost the flavor of her play. She swung smartly about and without as much as a nod, leaving an endless volley of questions completely unanswered, she elbowed her way into the street.

She had thought of going up to let Mr. Graydon see her and to ask of him some more wild questions, but she forgot.

Why did everyone, even George, who out of some very definite understandings between them, should know her pretty well—why did all of them think things? What was wrong with the world, the whole world? Was there no one who really knew about a girl? Not even among other girls?

Something very profound was stirring down below the surface of the deep brown eyes of Joanna, but it was still too abstract a confusion for her to grapple with. She was singing again when she reached home. The world for some unfathomable reason had picked her out to be good to.

When George arrived, breathless from her rush from the store, Joanna was to the midst of her feverish unpacking of boxes. She had forgotten her pique, and George had forgotten her offense apparently. She plunged in to help, vainly trying to get in questions between her squeals of delight over the procession of surprising new things. Whatever pertinent queries she had treasured up against opportunity to voice them were effectually silenced when Joanna remarked:

"Lay off tomorrow, George. Get sick or have a bolt or something. I'm going to take you to some place I found today and buy you some real things—whatever you want. But

you've got to wear your dresses looser, little daughter! That black satin you affect is all right, I guess, but when you get the real things that have some honest-to-goodness style in them, why you don't need to wear them so skimpy to look your best. If you don't know what I mean stay awake tonight and think it over, George. I'm giving you something straight!"

"So straight it sounds like a sermon to me," the other girl retorted. "And this isn't Sunday, either! But you've got a license all right, I suppose." It was a sententious finish, but Joanna preferred not to take it up.

Joanna heard Mrs. Adams through half open doors tell other girls in the house that the drawing room has been assigned for the evening and heard the flippant rejoinders that "there were lots of other wide open spaces in the world anyway." After a while, after she had resigned outright one of her new gowns to George as an installment of tomorrow's promise, she thought she heard John come in the front door. She listened eagerly, lips hot, eyes shining and body trembling, but there was no call from Mrs. Adams. She fell again to examining herself in her bit of mirror, twisting and squirming to glimpse as much as one time as possible of her gorgeously soft and glimmering evening gown, out of which her throat lifted round and white. She'd always had a frock without sleeves and a fairly low cut neck, but each of them, modest affairs, had made her hungry for something real—something that really would be a gown. At last! What the feel of that dress was to Joanna nobody but Joanna will ever know. She wouldn't admit it herself, and it's the sort of thing that can be painted on a canvas or put into music, but never said in words.

She heard the rattle of the door-bell. She signed to George to be quiet and opened her door an inch or two. She heard Mrs. Adams answering an inquiry, and the voice she heard then was not John's, but the quiet, modulated tones of the man she had met at the bank—Brandon.

She heard Mrs. Adams' confusion. "Why, yes, I'll tell her you're asking for her," the puzzled landlady was saying. "But I don't know whether to put you in the parlor to wait or not. There's someone—her friend—is to there. I've just been talking to him about her. She doesn't know he's here yet."

And then Brandon's suave voice: "I am sure we will get on famously, her—her friend and I. We'll talk about her, too, you see, if she is very long coming down. I have brought her some flowers. Will you be good enough to hand them to her?"

Joanna heard Mrs. Adams herding him into the "drawing room only" and in her dilapidated, blundering way mumbled an introduction. So John had come in. She was right when she thought she heard him. And he and Mrs. Adams had been talking together all this time in muffled whispers so she would not know—talking of her. And now Brandon, a man who she thought knew what was a secret from her, had come, as he had lightly threatened, and John would see him. Brandon and John! She wanted to keep John. She'd never realized before how much.

She didn't know why, but Joanna was afraid as she went downstairs; so soft and young and beautiful in her costly new gown, and so flushed from the day's events, but afraid.

Produces Cold Light

A demonstration of a method of producing cold light was given recently by a scientist at Manchester, Eng. By the process the electricity is changed to light without the luminous substance being heated in any way.

You can measure civilization's progress by the statues it erects to those it once called cranks.

Cuticura SOAP

Best For The Skin

Because it cleanses, invigorates and preserves the skin, scalp and hair. Used daily, assisted by Cuticura Ointment when required, it prevents pore-clogging, pimples, blackheads, and other annoying irritations.

Sample Each Free by Mail. Address Canadian Distributors: "Cuticura Soap Co., Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c. "Cuticura Shaving Stick 25c."

A Pessimistic Picture

Fears Women in United States Will Soon Be Ugly

Intelligence and beauty go together, and because the most intelligent section of the population is having small families, the American woman is becoming ugly, states Albert Edward Wiggin, scientific writer. The most intelligent 25 per cent. of the population are having only one or two children to a family, while the least intelligent, and ugliest, 25 per cent. are producing three or four.

"If this process goes on, beautiful women will soon be remembered only in pictures," he said. "And when beauty declines, intelligence, morals, health, sanity and longevity all go with it, because all are linked with beauty."

Little Helps For This Week

Not slothful in business, fervent in spirit, serving the Lord.—Rom. xii, 11. Since Thou hast added now, O God!

Unto my life another day, And giv'st me leave to walk abroad And labor in my lawful way, My walks and works with me begin; Conduct me forth and bring me in.

Remember that if the opportunities for great deeds should never come, the opportunity for good deeds is renewed for you day by day. The thing for us to long for is the goodness, not for glory.—Frederic W. Farrar.

Likely In Canada Too

Large Percentage of Earnings Spent On Motor Cars

It is only 25 years since the automobile emerged as a commercial product, and today the manufacture of motor vehicles takes first place among American industries. The bureau of industrial technology estimates our annual automobile bill at \$4,000,000,000. This makes an interesting comparison with the total business of our retail stores, which has been estimated at \$25,000,000,000. Computations of this sort are obviously subject to a wide margin of error, but it seems safe to conclude that, roughly, for every dollar spent for food, clothing and house furnishings, we spend 40 cents on motor cars and their upkeep.—New York World.

Asparagus Used Centuries Ago

Culture of Plant Introduced Into England During Reign of William III.

Before the days of Henry VIII, vegetable gardens were not made in England. Asparagus, with its remarkable properties, was used as a food 200 B.C., and though our Tudor ancestors ate the whole of the stalks with spoons, the culture of this plant was not introduced until the reign of William III, when Sir William Temple brought it from the Hague. The King, visiting Sir William at Moor Park, showed Jonathan Swift, the secretary, how to eat it in Dutch style. "King William always ate the stalks whole," said Swift.

Short Story

Shotgun. Dizzy hunter. Stubble field. Brown bear. Bang! Bang! Please omit flowers.

Minard's Liniment for backache

A man is prouder of things he thinks he can accomplish than of those he really can.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

It takes forty years to make a millitary machine; four years to break it; a million years to learn better.

Could Not Remember Wife's Christian Name

Elderly Farmer Had Never Used It In Addressing Her

In certain parts of rural England it is uncommon for a man to address his wife by her baptismal name, an illustration of which Thomas Hardy, the novelist, recently told the following story: An elderly farmer called in a lawyer and explained that he wished to make his will. The lawyer took out his fountain pen, and prepared to receive his client's instructions. "I'll leave all my brass to my wife," the farmer said. "We've been married thirty years." "What's your wife's Christian name?" asked the lawyer, making a note of the bequest. The farmer scratched his head, thought hard for several seconds, and finally said that he couldn't remember. The lawyer thought of a plan that would spur his memory. "Walk to the door," he suggested, "and shout upstairs as if you were calling her." The farmer did, and shouted, "Missus."

Laboring Under A Mistake

Colored Pastor Had To Do His Own Collecting

"Bredem, sistern," said the pastor, sadly, surveying his dark flock with a face full of woe, "when I done took this coogation I was promised a salary. This salary was to be paid in chickens. I have been expoundin' de scripture for two months, and now I wishes to ax—what is dem chickens?" There was a long silence.

Then a gaunt deacon arose and said: "Rev-erend Jones, we is mos' heartily sorry dat yo' has been de victim of a mistakenship. Yo' has misunderstood de method ob which our pastors is paid. We provide yo' wid de inotern and two gunysacks and den yo' collects dat salary yo'self."

Microscopes Used In Detection Of Crime

Reveals Many Things Naked Eye Would Never See

While Sherlock Holmes has been depicted as an inveterate user of the microscope—or common magnifying glass—his work of the kind was as nothing to that now being done in New York in the use of magnifying instruments in the detection of crime. Particles of dust and lint almost too fine to be noticed with the naked eye have been linked with scenes of crime, after being taken from the persons of suspects.

Women Learn Engine Driving

A school has been opened at Bridge to teach women to drive steam locomotives. Women pupils do not disrobe the skirt, which in fact they wear rather long, but practical work probably will make graduates adopt trousers and overalls, as so many women did in France when forced by the war to take up men's professions.

Genuine
ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Usually "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monacetyl-salicylic acid of Salicylic acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Insulated Walls Cut Coal Bills

To heat a building economically you must keep cold and dampness outside and warm air inside. Both of these duties are efficiently performed by Hercules Building Paper. Being absolutely impervious to winds and moisture it reduces heating expenses.

Hercules Sheathing is made from the highest grade wood pulp and reinforced with a protective coating which will endure as long as the walls.

We will send samples and prices to builders upon request.

WOMAN COULD HARDLY WALK

Mrs. Horn Tells how Lydia E. Pinkham's Vegetable Compound Restored Her Health

Hamilton, Ont.—"I have taken Lydia E. Pinkham's Vegetable Compound and would not be without it now. I had a female trouble so badly I could hardly walk and I was all run-down and could hardly get around to do my housework. I would be in bed three or four days at a time. I was told by a friend to try your Vegetable Compound. I did, and by the time I took two bottles I was beginning to get around again. I took ten bottles in all, and now I am all right again and doing my own work. I have six grown-ups to work for, so I have plenty to do. I also used Lydia E. Pinkham's Sensitive Wash, and I think it is good. But I owe my health to the Vegetable Compound, and I think if more of it was used women would be better off. I would not be without it if it cost twice more."—Mrs. NELLIE HORN, 28 St. Matthews Avenue, Hamilton, Ontario.

Do you feel broken down, nervous and weak sometimes? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly not persistently, will relieve this condition. C

Al. G. Barnes Big 4-Ring Circus

Will Exhibit Afternoon and Night at Cardston on Friday, June 25th

The announcement of Al. G. Barnes 4 Ring Circus appears in this issue. The coming of this organization is welcome news as the Al. G. Barnes circus is one that always presents a clean, wholesome and entertaining program.

This year, according to announcements, the circus has been greatly enlarged, and in addition to the all new spectacle of Pocahontas at the court of Queen Anne with the enormous cast, selected from the 1080 employees, other new features are: 180 horses in one big act, the Fez Ton Tribe of Arabs from the Sahara Desert, their first visit to America, the Canton Troupe of Chinese Circus Artists, the Imperial Midget Family from Bavaria, Joe Martin(himself) the Giant Gorilla Man, Lotus, the only performing hippopotamus in the world, and the famous exclusive Al. G. Barnes feature, 40 dancing horses and 40 dancing girls, and Al. G. Barnes appears in person at each performance.

Owing to the enormous size of circus this year, the management announces that no street parade will be given in any city visited, however, in place of the omitted procession, a mammoth open air free exhibition will take place on the show grounds at 1 p. m. and 7 p. m. immediately preceding the opening of the circus, and the largest traveling menagerie in the world comprising over 400 rare animals from all quarters of the earth.

The circus performance starts at 2 p. m. and at 8 p. m. Ample parking space for autos is reserved on the show grounds and a city ticket office, where numbered reserved chairs may be obtained at same price charged on the show grounds, is maintained in each city.

Voters Attention!

Directions as to the use of Preferential Ballot

The preferential ballot will come into general use for the first time in the forthcoming provincial elections. Every voter should be thoroughly conversant with the method of marking the ballot before attempting to vote. Read these instructions:

The voter must not use the X mark.

The voter must place the figure 1 opposite the name of the candidate who is his first choice, the figure 2 opposite his second choice, the figure 3 opposite his third choice and so on until he has voted for all the candidates on the ballot if he so wishes.

The voter may plump for one candidate alone using the figure 1, without spoiling his ballot, but is urged to vote to the full extent of his choices, as it is only by doing this that the voter obtains the full benefit of this form of ballot.

The voter must not place more than one choice opposite any one candidate.

The voter must not make the same choice for more than one candidate.

The voter must not make any mark on the ballot not authorized by these directions.

Read These Instructions Carefully

JOHN D. HUNT,

Clerk of the Executive Council, Government of Alberta.

Want Ads Pay Big

Vote Out The Party System!

What caused the organized farmer to enter the political field, and with the consent of the electorate, to take over the reins of government in Alberta five years ago? Principally, the cynical disregard of the needs of western Canada's greatest industry by party politicians, and the failure of the party government formerly in power to provide clean and efficient administration.

Every other business and industry in Alberta is organized, and uses all the political pressure it can bring to bear to have its wishes passed into law. During the last session of Alberta Legislature, deputations representing organizations of manufacturers, labor unions, doctors, lawyers, dentists, livestock dealers, etc., put their views before the members of the house. This is right and proper, but why are the farmers denounced for organizing for the purpose of securing representation in the House? The reason is that the U. F. A. interfered with the working of the party system.

Alberta is primarily an agricultural province. Legislative action is required to secure lower freight rates, encourage efficient marketing, build better roads, and generally secure the welfare and prosperity of the farming community.

The party system would not be alive today but for the nucleus of city politicians who revive it at every election. Hundreds of city orators are speaking in every part of Alberta during this election, endeavoring to divide the farmers into opposing groups. The overtures made for a business government, with city representatives co-operating with rural members on non-party lines have been rejected, except by labor.

The party system has proved inefficient in administration as compared with the co-operative system. Here are some additional comparative figures:

Land Titles Office Costs, 1921, \$241,909, 1925, \$156,753; Election costs, 1921, \$248,000, 1923 plebiscite, \$133,000; Estimated Election Costs, 1926, 130,000. Reductions in controllable expenditures, 1921 to 1924 inclusive, Alberta 14 per cent; Saskatchewan, 12 per cent, Manitoba 8 1-2 per cent. Increases in all other provinces. Agricultural Education, 1921, 320 students, \$191,000, 1925, 360 students, \$103,000. Many other instances can be given.

The U. F. A. are expending a considerable sum in advertising through the weekly press, the funds for this being contributed by the membership, so that the electors may know the truth. The city newspapers are endeavoring to perpetuate the party system.

A VOTE FOR A U.F.A. CANDIDATE IS A VOTE FOR EFFICIENT AND IMPARTIAL ADMINISTRATION

Issued by the U. F. A. Publicity Committee, Calgary
